# Dương Tấn Hòa

Fullstack Developer (MERN | AI-integrated Apps)

0799435534 ttanhoa263@gmail.com https://bunz-portfolio.vercel.app/ Quận Thủ Đức, Tp HCM

## CAREER GOALS

Backend-oriented Web Developer with hands-on experience in building scalable MERN applications and AI-powered features (RAG chatbot). Apply a project-based learning approach, proactively master new backend technologies through independent study—demonstrated by completing 2 backend projects—and actively pursue clean code best practices.

Passionate about leveraging modern technologies and AI-assisted development tools to deliver high-quality, production-ready systems efficiently.

**Short-term Goal:** Secure a Web Developer position to contribute to real-world projects, refine backend/frontend expertise, and sharpen teamwork and problem-solving skills.

**Long-term Goal:** Build a rock-solid technical foundation to transition into a Fullstack Engineer / Technical Lead, driving impactful web and AI-integrated solutions.

## EDUCATION

**Duy Tan University** **2022 - 2026**

**Information Technology**

- Achieved a GPA of 3.31, reflecting strong academic performance. Graduated early in 3.5 years with Good degree.
- Achieved a score of 530 on the TOEIC standardized English test. Capable of reading and understanding technical documents.

## SKILL

Technical skills

- **Programming Languages**: JavaScript, TypeScript, C# (basic).
- **Frontend**: ReactJs, Redux, ReactQuery, Bootstrap, Ant Design, SASS/CSS3, Pug.
- **Backend**: Node.js (Express), Sequelize, MongoDB/MySQL, RESTful API, JWT Auth.
- **AI Integration**: RAG, LangChain, OpenAI API, Pinecone.
- **Other**: Github, Git Flow, Postman, Cloudinary, Algorithm, GenAI, SocketIO, Nodemailer.

Soft skills

- **Communication skills**: Clear, concise, and comprehensive work content.
- **Self-learning mindset**: Curious and eager to explore relevant knowledge and issues.
- **Time management skills**: Balanced full-time study and part-time work throughout university, graduating in 3.5 years while maintaining strong academic performance.
- **Teamwork**: I have previously held the role of Team Lead / Scrum Master in coursework projects.
- Ability to learn quickly and problem-solving skills.

## WORK EXPERIENCE

**SapotaCorp Information Technology Company** 03/2026 - 05/2026

**Fullstack Developer | Intern**

- Worked on outsourced projects with unfamiliar tech stacks, requiring rapid self-learning and adaptation.
- Leveraged AI tools (ChatGPT, Claude) to accelerate onboarding and debug issues in unfamiliar codebases.
- Delivered assigned features under tight deadlines in a fast-paced, KPI-driven environment.

## PROJECT

**E-Commerce Platform - Fullstack** -

**Demo: https://project-webshop-reactjs.vercel.app**

**Core Features**:

- **Admin Features**: Dashboard admin, User Authorization(RBAC), Manage CRUD Items.
- **Payment Integration**: Support for multiple payment gateways (VNPay, Momo).
- **Security**: RBAC, JWT authentication, data encryption, and secure payment handling.
- **Discounts & Coupons**: Apply promotional codes, sales campaigns, and loyalty programs.
- **Shopping Cart**: Designed a real-time shopping cart system with dynamic price updates, ensuring consistent state synchronization between client and server.
- **Chatbot AI:** Developed a content creation chatbot leveraging RAG, LangChain, Pinecone, n8n workflows, and OpenAI GPT for enhanced contextual responses.

**FrontEnd:**

**Github**: https://github.com/bunprodzai/project-webshop-reactjs

- **React.js**: Build dynamic, reusable UI components with modern hooks and component-based architecture.
- **Redux**: Manage global state with predictable data flow and handle async logic using middleware.
- **Ant Design - SCSS - Tailwind CSS**
- **React Query**: Optimize API integration with caching, background updates, and server-state synchronization.

**BackEnd:**

**Github**: https://github.com/bunprodzai/project-webshop-api

- **Node.js + Express.js**: Build scalable, high-performance backend services with JavaScript runtime.
- **MongoDB**: Design and manage NoSQL databases with Mongoose for flexible data modeling.
- **VNPay, Momo**: Integrate online payment gateway for e-commerce applications.
- **JWT (JSON Web Token)**: Implement secure authentication and authorization mechanisms.
- **Utilities**: Dotenv, Nodemailer, MD5, OpenAI, ...

---

**QR Code Ordering System - Fullstack** -

**Demo: #**

**Core Features**:

- **Admin Features**: Dashboard admin, Manage CRUD Items
- **Payment Integration**: Support for multiple payment gateways (VNPay).
- **Realtime Interaction:** Real-time updates for order status, menu prices, and item availability.
- **Socket.IO** enables instant communication between clients and server.

**FrontEnd:**

**Github**: https://github.com/bunprodzai/client-ordering-system

- **React.js** – Build dynamic and reusable UI components using a modern, component-based architecture.
- **Redux** – Manage global state with predictable data flow and handle async operations.
- **Socket.IO Client** – Enable real-time data communication with the backend.
- **UI Frameworks:** Ant Design, Tailwind CSS, and SCSS (Sass) for a responsive and elegant interface.

**BackEnd:**

**Github**: https://github.com/bunprodzai/server-ordering-system-typescript

- **Node.js + Express.js, VNPay Integration, MongoDB.**
- **Socket.IO:** Real-time connection handling between clients and the server.
- **Utilities:** Dotenv, JWT Authentication, QR Code Generation, Nodemailer, ...

---
